A. Sample Citation and Introduction to Citing Entire Books

The general format for a reference to a book, including punctuation:

Examples of Citations to Entire Books

A book is a publication that is complete in one volume or a limited number of volumes; books are therefore often called monographs. Textbooks, technical reports, conference proceedings, master's theses and dissertations, bibliographies, and patents are all examples of monographs. This chapter focuses on the standard book and textbook. Because technical reports and other specific types of monographs have additional special features, they are treated in their own chapters.

References to books in print or in microform (microfilm, microfiche) are included in this chapter. For references to books in audiovisual format, see Chapter 15; in electronic form, see Chapter 18 and Chapter 22.

The chief source for information about a book is its title page. The back of the title page, called the verso or copyright page, and the cover of the book are additional sources of authoritative information not found on the title page.

Note that the rules for creating references to books are not the same as the rules for cataloging books. Therefore records found in the NLM LocatorPlus and the NLM Catalog databases will not always agree with the instructions presented here.

Citation Rules with Examples for Entire Books

Components/elements are listed in the order they should appear in a reference. An R after the component name means that it is required in the citation; an O after the name means it is optional.

Author/Editor (R) | Author Affiliation (O) | Title (R) | Content Type (O) | Type of Medium (R) | Edition (R) | Editor and other Secondary Authors (O) | Place of Publication (R) | Publisher (R) | Date of Publication (R) | Pagination (O) | Physical Description (O) | Series (O) | Language (R) | Notes (O)

Author/Editor for Entire Books (required)

General Rules for Author/Editor

- List names in the order they appear in the text
- Enter surname (family or last name) first for each author/editor
- Capitalize surnames and enter spaces within surnames as they appear in the document cited on the assumption that the author approved the form used. For example: Van Der Horn *or* van der Horn; De Wolf *or* de Wolf *or* DeWolf.
- Convert given (first) names and middle names to initials for a maximum of two initials following each surname
- Give all authors/editors, regardless of the number
- Separate author/editor names from each other by a comma and a space
- If there are no authors, only editors, follow the last named editor with a comma and the word editor or editors; see Editor and Other Secondary Authors below if there are authors and editors
- End author/editor information with a period

Specific Rules for Author/Editor

- Surnames with hyphens and other punctuation in them
- Other surname rules
- Given names containing punctuation, a prefix, a preposition, or particle
- Degrees, titles, and honors before or after a personal name

B(1). Sample Citation and Introduction to Citing Individual Volumes With a Separate Title but Without Separate Authors/Editors

The general format for a reference to a volume of a book with a separate title but without separate authors/editors, including pagination:

Examples of Citations to Individual Volumes With a Separate Title but Without Separate Authors/Editors

Many medical texts are published in more than one volume because the number of pages is too large to be contained in one physical volume. If a book is published in multiple volumes, and if each volume has a separate title, the volumes may be cited individually:

- Use the title page and the verso (back) of the title page of the individual volume as the source for authoritative information.

- Place volume information immediately following the overall title for the book and any edition information or secondary author.
- Give the pagination for the individual volume following the date of publication.

Components/elements are listed in the order they should appear in a reference. An R after the component name means that it is required in the citation; an O after the name means it is optional.

Book (R) | Volume and Number (R) | Title (R) | Location (Pagination) (O)

Book (required)

General Rules for Book

- Cite the overall book according to Chapter 2A Entire Books, but omit the Pagination

Volume and Number of Volume (required)

General Rules for Volume and Number of Volume

- Place volume and number information after the title of the book and any Content Type, Type of Medium, Edition statement, or Secondary Author
- Enter "Vol." and a space
- Follow the abbreviation for volume with the number of the volume
- Use arabic numbers only. For example: convert VI or Six to 6.
- End volume information with a comma and a space

Specific Rules for Volume and Number of Volume

- Non-English names for volumes
- Numbers labeled other than volume

6. Volumes of non-English books without separate authors/editors

Title of Volume (required)

General Rules for Title of Volume

- Enter the title of the volume as it appears in the book
- Capitalize only the first word of a title, proper nouns, proper adjectives, acronyms, and initialisms
- End title information with a period

Specific Rules for Title of Volume

- Non-English titles for volumes
- Titles containing a Greek letter, chemical formula, or another special character

6. Volumes of non-English books without separate authors/editors

Location (Pagination) of Volume (optional)

General Rules for Pagination of Volume

- Place pagination after the date of publication
- Provide the total number of pages on which the text of the volume appears
- Do not count pages for such items as introductory material, appendixes, and indexes unless they are included in the pagination of the text
- Follow the number by a space and "p." Examples: 438 p. and 1025 p.

Specific Rules for Pagination of Volume

- Roman numerals for page numbers
- Volumes continuously paginated

B(2). Sample Citation and Introduction to Citing Individual Volumes With a Separate Title and Separate Authors/Editors

The general format for a reference to a volume with a separate title and separate authors/editors:

Examples of Citations to Individual Volumes With a Separate Title and Separate Authors/Editors

If each volume of a book in a multivolume set has its own author(s) or its own editor(s) distinct from the authors/editors of the set of volumes, the individual volume may be cited. Begin the reference with the authors or editors and title of the individual volume; cite the overall set of volumes as a series.

For example, each volume in the following publication has its own editors, who are not the editors of the publication as a whole:

> Bellack AS, Hersen M, editors. Comprehensive clinical psychology. Amsterdam (Netherlands): Elsevier Science; 1998. 11 vols.

To cite one volume only of this multivolume set:

> Ollendick T, editor. Children & adolescents: clinical formulation and treatment. Amsterdam (Netherlands): Elsevier Science; 1998. 723 p. (Bellack AS, Hersen M, editors. Comprehensive clinical psychology; vol. 5).

Multivolume sets are bound alike with an essentially identical appearance and have one publisher. The volumes in them are considered primarily as a part of the set and often, but not always, have the same date of publication or are published over a short span of years. This is in contrast to large open series such as *Methods in Enzymology* and *Annals of the New York Academy of Sciences* which have published hundreds of volumes over decades. Such large series may be cited as journals (see Chapter 1), as NLM does in PubMed, but individual volumes may also be cited as part of the series.

Each volume in a multivolume set may have two title pages, one for the set and one for the individual volume. Use these title pages or their verso (back) for authoritative information to use in a citation. See also Chapter 2A for further details on the components of books.

Author/Editor for the Volume (required)

General Rules for Author/Editor

- List names in the order they appear in the text
- Enter surname (family or last name) first for each author/editor
- Capitalize surnames and enter spaces within surnames as they appear in the document cited on the assumption that the author approved the form used. For example: Van Der Horn *or* van der Horn; De Wolf *or* de Wolf *or* DeWolf.
- Convert given (first) names and middle names to initials for a maximum of two initials following each surname
- Give all authors/editors, regardless of the number
- Separate author/editor names from each other by a comma and a space
- If there are no authors, only editors, follow the last named editor with a comma and the word editor or editors; see Editor and Other Secondary Authors below if there are authors and editors
- End author/editor information with a period

Specific Rules for Author/Editor

- Surnames with hyphens and other punctuation in them
- Other surname rules
- Given names containing punctuation, a prefix, a preposition, or particle
- Degrees, titles, and honors before or after a personal name
- Designations of rank in a family, such as Jr and III

C. Sample Citation and Introduction to Citing Parts of Books

The general format for a reference to a part of a book, including pagination:

Examples of Citations to Parts of Books

Rather than citing a book as a whole, separately identified portions of a book may be cited. Chapters, sections, tables, charts, graphs, photographs, appendixes, and the like are considered parts of books when they are written or compiled by the authors of the book. They are contributions when the book has an overall editor or editors and the individual chapters or other components in the book are written by various authors, usually called contributors.

In general, most modern texts have standardized to three types of parts: figures, tables, and appendixes. However, other names may be found for parts, including section, chart, graph, box, and photograph.

Because a reference should start with the individual or organization with responsibility for the intellectual content of the publication:

- Begin a reference to a part of a book with the book itself, then follow it with information about the part.
- Begin a reference to a contribution with information about the contribution, followed by the word "In:" and information about the book itself. See Chapter 2D Contributions to Books for details.
- For instructions on citing one volume of a book published in multiple volumes, see Chapter 2B Individual Volumes of Books (Chapter 2B(1) Individual Volumes With a Separate Title but Without Separate Authors/Editors or Chapter 2B(2) Individual Volumes With a Separate Title and Separate Authors/Editors).

Medical texts frequently contain charts, figures, and other illustrative material that have been reproduced with permission from other sources. Do not cite these as parts using the instructions presented here. Consult the original publication and cite the particular item from there.

D. Sample Citation and Introduction to Citing Contributions to Books

The general format for a reference to a contribution to a book, including punctuation:

Examples of Citations to Contributions to Books

Contributions are found when a book has an overall editor or editors and the individual chapters or other components of the book are written by various authors, usually called contributors. One or all of the editors may also be contributing authors. Because a reference should start with the individual or organization responsible for the intellectual content of the publication, begin a reference to a contribution with the author and title of the contribution, followed by the word "In:" and information about the entire book.

Medical texts frequently contain charts, figures, and other illustrative material that have been reproduced with permission from other sources. Do not cite these as contributions using the instructions presented here. Consult the original publication and cite the chart or other item from there.

Citation Rules with Examples for Contributions to Books

Components/elements are listed in the order they should appear in a reference. An R after the component name means that it is required in the citation; an O after the name means it is optional.

Author/Editor (R) | Author Affiliation (O) | Title (R) | Connective Phrase (R) | Book Information (R) | Location (Pagination) (R) | Part (R)

Author/Editor of a Contribution to a Book (required)

General Rules for Author/Editor

- List names in the order they appear in the text
- Enter surname (family or last name) first for each author
- Capitalize names and enter spaces within surnames as they appear in the document cited on the assumption that the author approved the form used. For example: Van Der Horn *or* van

der Horn; De Wolf *or* de Wolf *or* DeWolf.

- Convert given (first) names and middle names to initials, for a maximum of two initials following each surname
- Give all authors/editors, regardless of the number
- Separate author/editor names from each other by a comma and a space
- If there are no authors, only editors, follow the last named editor with a comma and the word editor or editors
- End author/editor information with a period

Specific Rules for Author/Editor

- Surnames with hyphens and other punctuation in them
- Other surname rules
- Given names containing punctuation, a prefix, a preposition, or particle
- Degrees, titles, and honors before or after a personal name
- Designations of rank in a family, such as Jr and III
- Names in non-roman alphabets (Cyrillic, Greek, Arabic, Hebrew, Korean) or character-based languages (Chinese, Japanese)
- Non-English words for editions
- Organizations as author
- Options for author names
